

## OPESUS

---

### We make SAP sustainability solutions work!

**opesus** provides SAP-based software solutions and consulting that allow companies to run a sustainable business. Our extensive product development and deep technical expertise allows us to offer effective and efficient technical solutions. Our team is highly competent, flexible, professional, and committed to the success of our customers.

#### SAP CONSULTING

---

Our experts will help you discover and resolve problems and challenges that you're facing

#### INNOVATIVE SOLUTIONS

---

We deliver solutions that complement and enhance SAP sustainability solutions.

#### SOFTWARE DEVELOPMENT

---

Our unique strength: deep SAP software development expertise combined with regulatory know-how

## Our Story

**PRESENT**

Our modest but mighty team is creating software and consulting our 95+ customers, helping them more effectively and efficiently achieve their compliance and sustainability goals.

**2016**

Our first office in the USA was established in Chicago.

**2014**

As the team continued to grow, the Ravensburg office was established.

**2013**

The Frankfurt office was established to better serve our customers in the region.

**2012**

opesus was founded by former employees of the Sustainability Department of SAP.

# Our Solutions

## opesus EHS Product Notification (EPN)

Our flagship software is the market leader among SAP customers. opesus EPN supports the end-to-end process of product notifications for customers to fulfill their legal obligations for various formats such as Poison Centre Notifications (PCN) and SCIP Database.

opesus EPN leverages data in your SAP ERP to ensure compliance simply and efficiently.

### SUPPORTED FORMATS

## opesus EHSM Smart Input (ESI)

opesus ESI extends SAP EHS Management with easy and efficient maintenance of large amounts of data for products, components, risk assessments, and chemicals. The clean and user-friendly interface assists users in their daily work. With ESI, you can manage or migrate a large number of product declarations or risk assessments in one operation. This saves you time, effort, and ensures data quality.

## opesus Product Compliance Essentials (PCE)

opesus PCE is a rapid implementation package for SAP EHSM Product Compliance. It allows a standardized implementation in 4 months at a fixed price and contains best-practice information, such as: pre-configuration, programs and tools, templates, documentation, and a harmonized project methodology.

## We are proud to serve...

**95+**  
companies  
in **13+**  
countries

...and many more!
